9. ☐ Other _____.

REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: none of the prior art of record alone or in combination teaches a multi-direction applicator comprising an elongated inner tube having a closed end and an open end and one or more score lines formed along the length of the elongated tube; and an elongated tubular outer housing substantially enclosing the elongated tube with two ends that are sealed near the two ends of the elongated tube and encloses a fluid therebetween the tubular outer housing and the elongated inner tube; wherein the elongated tube is fractured at one of its score line by bending the tubular housing and the elongated tube so that the fluid may be squeezed out of the elongated tubular housing through the fractured opening, into the elongated tube, and out through the open end of the elongated tube.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Miller, Caillouette, and Avery disclose an applicator having an outer housing and an inner breakable tube; however, the fluid is being housed within the inner breakable tube, which is not what is being claimed as indicated above. Seifert

and Barabino et al. disclose different type of applicator without an inner housing and an outer housing.
